

Pedar's Weekly Review

Friday 6th June

English

We have started a new unit looking at Play scripts this term. We have looked at the features of a play script and studied the descriptive language used in the stage directions. The children have been learning how to improve stage directions by using powerful verbs and adverbs to give direction on the movement of the actors and delivery of the dialogue. We have also been learning about proverbs from across the world. We have been comparing English proverbs with those from other countries and the children have been trying to work out their meanings.

Art

In Art this week, we enjoyed an outdoor session in the nature reserve. The weather was warm and the children gathered sticks, stones, feathers, leaves and flowers and anything else they thought would be suitable for their artwork. Working collaboratively in small groups, they arranged the material into patterns and shapes and created an art piece inspired by the British sculptor and environmentalist Andrew Goldsworthy. I was impressed with their efforts.

Maths

We have been continuing our work on shapes by looking at the different types of lines that make up shapes: horizontal, vertical, parallel and perpendicular. The children have been learning how to recognise them and they have been practising drawing them correctly.

Science

We have been continuing our topic on Plants and been studying the inside of a flower in more detail. We have looked at the different male and female parts of the flower, drawn them and learnt their function in fertilisation and pollination.

Messages

You are invited to a Parent Workshop on Internet Safety on Wednesday 19th June 6.30-7.30pm in the school hall. Please email the school office to let us know that you will be attending.

Don't forget about the spelling Bee on Monday-get your last minute practice in over the weekend!
