CHERRY - WEEKLY REVIEW - week ending 3.2.11

What have we been doing in Cherry this week?

Literacy Our Doctor Who scripts have been taking form this week. Everyone has been working extremely productively in their teams, producing exciting and very dramatic scripts for the Doctor Challenge. The children have incorporated all the technical skills in script writing for the Doctor Who team, including the use of specialized technical abbreviations in their stage direction. Miss Baxter and I are looking forward to selecting one to enter in the BBC competition.

Maths Children in Cherry have been revisiting their measuring skills. This has included a fun investigation into human body proportions, as well as some novel but accurate methods of measure. We have also practiced converting different units of measurement, and used our number skills to work out the fractional proportions of different units of measure.

Other Subjects Science: the children have learned about how electricity works and what it is made of. They have had to write detailed explanations for a range of different circuits they have constructed and 'repaired' using new vocabulary: electrons, volts, resistance. In topic, the children finished off making their wonderful engraved Anglo Saxon masks. They learned about Anglo Saxon warfare. In PSHCE the children have been learning about their own personal preferences in learning styles, and celebrating their differences.

What will we be doing in Cherry next week?

The children will be putting together their Anglo Saxon booklets, choosing the layout and decoration as well as selecting which information to present.

In literacy, we shall begin our new unit of work on biographies, and look forward to interviewing somebody to write about.

In maths, we shall be revisiting data handling.

DATES FOR YOUR DIARY AND NOTICES

- BSA Quiz Night Saturday 4th February
- Key Stage 2 Creative Project Assembly Friday 10th February
 - Half Term 13th -17th February

HOMEWORK

SUBJECT	TASK	DATE DUE IN
