Hazel

It's Science Week!

The children have had great fun this week investigating the human body through sport. The children were invited by Sebastian Coe to join the Super Sports Science Club. To do so they had to help with some tricky challenges! The children had to investigate: Are our body measurements similar? Can we increase our reaction time with practice? What is the fastest step? Do longer legs leap further? We used careful measuring skills, good observation and refined our predictions to solve the challenges. With all this knowledge we were able to design a Super Athlete - just like us! Have a lovely weekend and Mother's Day everyone!

The children were fascinated to find out about space and satellites with David Whittle. The children had lots of questions and were given some great answers. We all learned a lot!

Science Week Visitors

Wysing Arts 'The Art of Memory'

The children enjoyed drawing their favourite toy from memory. They had to think carefully about the details.

Science of Jewellery

Harriet Kelsall came in to speak to us about the Science involved in her jewellery design business. The children enjoyed hearing about how precious metals and gemstones are mined and then transformed into the jewellery pieces she brought in to show us!

Homework

This is a **4 week** homework project. You can find out more about the Olympic mascots that have been designed for the 2012 Olympic games. You are then to design your own Olympic mascot, give it a name and make a 3D model of it. You can use any method you like to make it, paper mache, clay, junk modelling, lego, fabric or any other ideas you may have! We will use your models to create a wonderful display in our classroom.

Due in Tuesday 17th April 2012

Electricity and Printers

Steve Fenton spoke to us about his job as an Electronics Engineer. I am sure the children will enjoy telling you about the custard demonstration!

Notices

Clear Jam Jars - please can you send in any clear jars that you have for us to use as part of a new whole school reward system linked to the Olympics.

Headlice - Some parents have found head lice in their children's hair in KS1 this week. Please can you ensure that you check your child's hair regularly and treat it straight away if you do find any.

Best wishes
Mrs Daniels and Mrs Seymour
