

Weekly Review

15th March 2019

Acorn

What a fun filled week we have had! Science week has been a huge hit with the children. We have explored time, physical and chemical reactions, windy weather, light, magnets and have been learning about how hot air balloons work. Many thanks to our visitors. Some photos and work have been on display in the classroom to share with our grown ups. We hope you

Acorn

Whizz pop bang!

Here we are making fizzing fairy potion. We filled our cups with $\frac{1}{4}$ vinegar, added some coloured paint powder, glitter, washing up liquid and gave it a stir....then it was time to see the reaction when we added some bicarb of soda. We mixed in a spoonful of soda to our mixture and gave it a stir with a magic wand....and our mixture went crazy!! It was great fun to watch it fizz up and over the cup into the tray. Below are photos of our hot air balloon experiment. We learnt that the hot air allows the balloon to fill up and rise. Cold air is added to the balloon for when it is time to land again.

Many thanks to our visitors this week. The children were so excited to learn new scientific facts and have applied their new knowledge to many activities through the week.

Next week sound/book focus:

Oo,ar and or

Home learning:

Practise reading tricky troll words. (In child's plastic wallet). Feel free to cut word cards out and use as you need at home.

Sponsored bike ride

We are sad to announce that our water/ sand tray is suffering from multiple holes which are beyond repair. We have already lost one due to cracks and holes at the beginning of the year so now we are looking ahead and would like to replace the ones we have.

Unfortunately the trays are very expensive and as you know our funds are very thin on the ground. So.....

We are planning on having a sponsored bike event at the end of this half term to try and raise some money. Details will follow next week and we hope you will support Acorn Class in our efforts to raise enough money to buy a lovely new tray for the children.
