

# Weekly Review – Cedar Class

Friday 6th December 2019

## Maths

We have been learning to add and subtract multiples of 100 this week and we have been looking at helpful ways to do this mentally. The children have then worked on a series of calculations and varied fluency problems adding and subtracting in multiples of 100.

## English

We have been discussing the features of recounts (first person, past tense, chronological order, speech marks for spoken word etc...) and looking at what a good example of a recount looks like. We worked together to identify and underlined the features in the extract then found an article in the newspaper that interested them and tried to identify all of the same features correctly in the article.

## Science

We have been looking at magnets and their magnetic field this week and learning how magnets use their force to attract certain objects towards them. The children went on a tour of the school looking for objects that the magnet would attract and those that it would not, and they grouped them as magnetic or non-magnetic. We then looked at what materials are magnetic.

Please send in cardboard tubes for the older children to make Christmas crackers for everyone? Many thanks.

## Notices and Dates for your Diary:

17<sup>th</sup> December - Christmas Jumper Day and Christmas Dinner.

18<sup>th</sup> December - Last day of Term

Please support your children to keep up with their good reading and to keep practicing their mental maths.

Homework: Maths Adding and subtracting multiples of 100.

## History

The children have been pretending to be Estate Agents this week and have used persuasive language to write descriptive house details for a Viking long house. They described the house, the way it was built, highlighted its features and produced a leaflet to try to persuade someone to buy it.
