

Weekly Review – Cedar Class

Friday 11th December

THIS WEEK

The children have been developing their skills in informative writing. They have been completing an extended piece of non-fiction writing on either eagles, elephants or cars, using headings and paragraphs. In maths, we are learning multiplication and we have started by looking at equal groups. In history, we have been learning about roundhouses and hillforts and practicing our find and retrieve skills by answering questions about how the Celts lived during the Iron Age. We have enjoyed learning about magnets and their magnetic force in Science.

NEXT WEEK

In maths we will be looking at multiplication sentences and the relationship between times and addition. We will continue to develop our skills in informative writing in English. The children will also get to enjoy some festive activities. Most excitingly, they will be treated to an online performance of Jack and the beanstalk on Wednesday! Oh no they won't! Oh yes they will! 😊

NOTICES & REMINDERS

Thank you to all of you for your support with costumes over the last couple of weeks. Our Christmas performance is now finished and will be ready for viewing next week. Enjoy! 😊

I would like to take the opportunity to wish you all a wonderful Christmas break. Let's hope and pray that 2021 will be kind to us all. 🙏

HOME LEARNING:

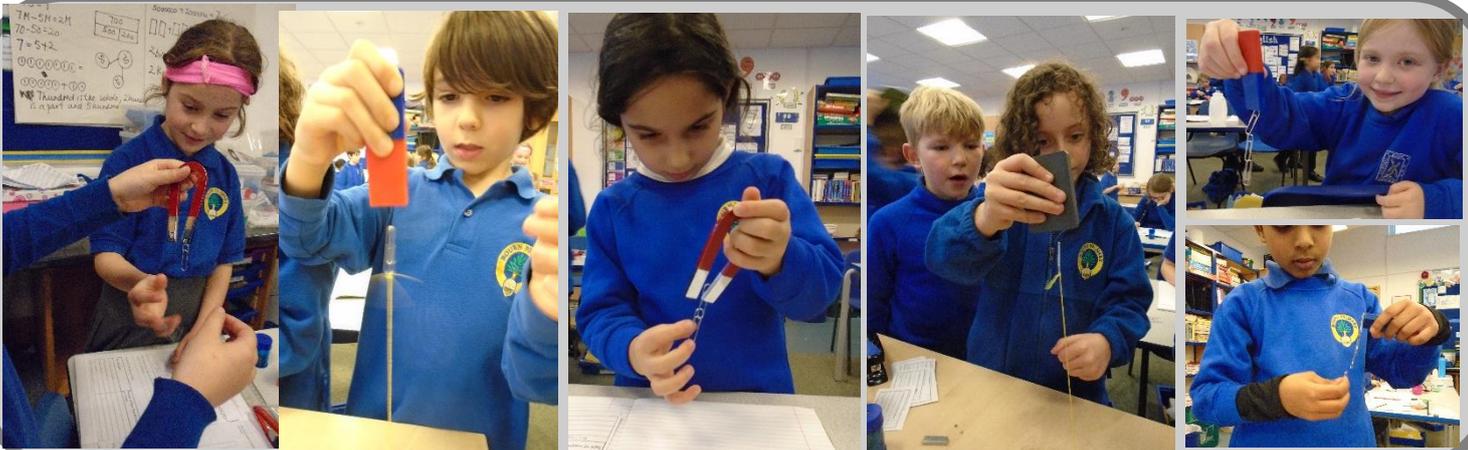

Maths: We are now working on multiplication in school so the more confident the children are with their times tables the better. Year 3 times tables are 3, 4 and 8.

Times table Rockstarz is great for times table practise!

English: Daily Reading and Spelling practise for Friday 8th January: creating adverbs using the suffix-ly (root word ends in 'ic' or 'al').

Please return home learning books to school by the 16th December.

I will be sending home a Christmas booklet with some optional home learning activities in for those that want it.

hope courage justice forgiveness friendship
